Job Description: Production Technician

Main Purpose

The manufacture and testing of a range of products to a high quality standard in line with Company procedures and documentation.

Is a member of the Production Department. Reports to the Production Manger.

Duties to include

- Assembly and testing of our instrumentation and ancillary equipment; to include calibrations, pre-testing, temperature cycling, final testing, electrical safety, EMC and PAT testing
- Assembly of small PCB's with surface mount soldering work
- Precision machining; to include the use of lathes, mills, laser engravers & welders, and other workshop equipment as required
- Producing build documentation for batch recording of parts and components, and the selection of individual parts to maintain quality
- Programming various devices including PLC's, EPROM's and flash cards from firmware masters

Knowledge, Skills and Experience Desirable (in-house training is provided)

- An understanding of electronic principles
- Familiarity with test equipment such as multi-meters and oscilloscopes
- Knowledge of and the ability to use lathes, mills and other workshop equipment to very high quality standards (or the ability to train quickly in their use)
- Computer literacy and proficiency in a range of Windows based PC applications (e.g. MS Word, Excel, Access)
- Surface mount soldering experience
- Attention to detail, good hand to eye co-ordination and manual dexterity
- Experience within the industry

Closing date 08/09/2017
